

Rainbow Melon

Top potency with a taste of the good old days.

- **Absolute power.** Up to 30% THC.
- **Melon and Fruits.** A smooth blend of melon and fruity terpenes.
- **Rock-solid buds.** Grape-shaped, super dense and beautiful flowers.
- **Great for extractions.** Delicious resin makes her a good choice for extractors.
- **Perfectly balanced.** Provides the best from her parents.

Rainbow Melon comes from a cross between the Melon strain from our collection of keeper cuts and Rainbow Chip (selection from Exotic Genetix). In only 9 weeks of flowering you will have a medium-sized plant full of very dense and resinous buds. Her aroma kicks in with a loud, distinctive terpene profile of Rainbow Chip highlighted by the citrus-like notes of sweet melon. Upon smoking, her sugary flavor leaves an aftertaste reminiscent of Pixy Stix or Tang flavors from our childhood. For the outdoor setups, make sure to pay attention to the temperatures and other conditions like humidity as this strain performs much better in moderate climates. For indoor growers, we recommend to opt for LST techniques and avoid high stress training to get the most out of her growth potential.
