

BubbleGum Auto

Easy to Grow, With Harmonious, Rich Strawberry Flavors & Top Shelf Potency.

- **Fiercely fruity.** A strong flavor of sweet red berries and bubblegum that will leave your mouth tasting like a mouth-watering smoothie!
- **Fast and vigorous.** This plant takes around 63 days and grows 130cm, perfect for growers who want big yields and a quick harvest.
- **Foolproof genetics.** Performs well in all climates and super resistant, perfect for beginner growers.
- **Impressive appeal.** Quality that can be seen from afar, the perfect bag-appeal for commercial growers.
- **A first-class revamp.** Expect an overall upgrade, better flavors and structure, impressive yields.
- **The ideal genetic blend.** Expect a well-balanced autoflower, just like the original old-school strain.

An old school gem that retains the ideal blend of Indica and Sativa, producing large yielding plants. Well suited for beginner growers who wish to see hybrid vigor displayed in its full form with a THC level of 20%. Only taking 9 weeks before she can be harvested, Bubble Gum Auto will pack on weight in a quick time frame, making her a perfect choice for growers who require big yields of quality flower.

Bud description

Her buds will be large and very dense, meaning that one bud can go a long way. The structure is quite compact and is encrusted in crystals, giving her a very sticky feel. When grinding a dry flower, the aroma is alluring and extremely fruity, floral, and sweet with a fresh strawberry edge. She has an impressive bag appeal and a great choice for commercial growers.

Smoke report

Bubble Gum Auto is a blast from the past. The effects are upbeat and joyful with a nice sense of clarity and creativity. An excellent choice for socializing, being out in nature going for a long walk, inspiring inner creativity, and having a motivated approach to the day.

Plant Appearance

This lady will grow quite tall and range between 80-130cm and will produce one main cola and long side branches. The buds will fill out every internode, frosting over everything in sight. A wonderfully sweet floral aroma that will make you think you are growing in a field full of strawberries. Her growth structure is bushy and will resemble characteristics of a Christmas tree, as she expresses her Indica and Sativa heritage. Her fan leaves will grow with a thin serrated pattern and will have a waxy look and feel, with medium-sized internodal spacing.

Grow Tips

Original Auto Bubble Gum can grow tall in some cases, so it is best suited for growers who have plenty of height in the grow room. She will also produce an abundance of smaller leaves that are covered in precious trichomes, meaning that making hash with the sugar trim from this hybrid strain pays off big. She works well in a Sea of Green and is a perfect strain for beginner growers, who want a strain that delivers in all climates and has a strong resistance. This strain is well known for being a heavy feeder that can take high amounts of nutrients, without showing signs of deficiency or toxicity, and can also withstand long dry periods and harsher climates. We recommend plant training during the first 4 weeks to enhance yields further.

Flavor

Her flavor is so fruity and intense, that it can be described as a strawberry smoothie combined with a sweet, earthy funk. It may feel like you have applied a berry lip balm as you take each toke. You will experience a delicious combination of sweet cherry, fresh strawberry, and old school bubblegum candy with a smooth earthy aftertaste.
