

## Zkittlez Auto

The new standard for autoflower genetics.

- **Candy sweet.** Taste the rainbow with the delicious sweet berry and extremely fruity flavors.
- **Overwhelming yielder.** This plant grows up to 100cm and produces 500gr/m<sup>2</sup> in just 70 days!
- **Indica delight.** A satisfying head high that leads into an anxiety-free and long-lasting body high.
- **Perfect for stealth growers.** One of the most sought-after genetics, now stronger and more compact.
- **Bathed in trichomes.** An insane amount of resin all over, perfect for extractors and hash makers.

Zkittlez Auto is one of our most popular strains to date and understandably so, with its top-notch stability, perfectly compact structure, up to 23% THC, and candy-sweet flavor. This Indica dominant hybrid fills the room with its overpowering scent and develops colas with american football-sized buds, which once harvested and cured, will provide the user with a nice and balanced cerebral and body stone without any intense couchlock.

### Bud description

Candy-hard, frost-covered buds. Zkittlez Auto produces large nugs that display various shades of green and pops of orange with the occasional subtle blue and purple tones. A nice long cure will really bring out the top-shelf quality by intensifying its complex fruity terps, on par with its bagged-candy counterpart.

### Smoke report

Starting out with a quick and pleasant head high then gradually leading into a relaxing body stone which will last around 3 hours, makes this strain great for an afternoon or night time smoke. It's not an overwhelming Indica high but will leave users serene and anxiety-free. Great for novice consumers and long time stoners.

### Plant Appearance

Zkittlez is perfectly compact, growing no higher than 1m in height, Zkittlez Auto develops multiple dense bud sites, a large main cola rocketing up vertically and a few lateral side branches. In late flowering, expect large, stacked colas, dripping in resin. As one of our bigger producers, growers could be looking at around 450-500g/m<sup>2</sup> in ideal conditions. Good internodal spacing, and highly resistant. A great choice for beginners and for advanced growers who want to adventure into plant training.

### Grow Tips

As one of our larger producers, growers may want to use some support to help her withstand the weight of her own buds. A sturdy strain that will respond nicely to LST and other light training methods that will produce multiple hefty colas to develop throughout the plant. Zkittlez Auto tends to take a lot of nutrients, so make sure you have high-quality nutes on hand to satisfy her hunger.

### Flavor

Sugary candy and berry flavors are the main notes of Zkittlez Auto, accompanied by tastes of mango and grapefruit with subtle, chocolate-like earthy undertones. Curing this strain for at least 2 weeks is obligatory if you really want to taste the rainbow.
